

NLP IN BUSINESS

ONE DAY TRAINING COURSE

COURSE OVERVIEW

We live in a world of unprecedented change. We are immersed in unpredictability and complexity. The more we discover the more there is to discover.

Every question reveals yet more questions. We need skills and attitudes to help us learn how to make sense of chaos. We need to know how to communicate with people of vastly different cultures and more than anything, how to communicate with ourselves.

COURSE BENEFITS

By providing the confidence to overcome beliefs that would normally limit us NLP creates a safety net that allows us to perform outside our perceived comfort zones, achieving more than we previously believed we were capable of. Since the personal performance of each employee is the bedrock of business productivity & success, applied correctly NLP can improve staff confidence and morale, increase team performance and productivity.

ONE DAY | 0900 - 1700 HRS

USD 1,000.0 / SESSION

20 PARTICIPANTS
