

TRAIN THE ENGINEERING TRAINER

ONE DAY TRAINING COURSE

COURSE OVERVIEW

The objective of this one day course is to teach engineering professionals/participants, adult learning, designing, planning and delivering a successful training program.

After the training they will be able to train and develop more staff in their respective departments to present engineering complex issues in more professional and easy to understand way.

COURSE OVERVIEW

Often this is said and witnessed that engineers are very good in engineering but not good at presenting engineering complex solutions to the seniors or juniors in the easy to understand way. This course will cover to improve their communication, body language, using tools to design and present their presentations or work, being engaging & being able to share the most critical knowledge in interesting ways to the audience.

ONE DAY | 0900 - 1700 HRS

USD 1,000.0 / SESSION

15 PARTICIPANTS

COURSE CONTENT

Understanding training need assessment
Learning / knowing about your audience
Knowing about the needs of the audience
Designing & engineering training program
Planning & executing training program
Pre-Post training evaluation - report
Factors to consider when developing others to train into future trainers
Communication skill jorgans
Using tools and programs to design your presentations

WHO SHOULD ATTEND

People in the following roles should participate in this training:

Maintenance managers
Production engineers
Mechanical engineers
Electrical Engineers
Operation coordinators
Maintenance supervisors
Plant engineers
